

Installation Guide of MailsSoftware Free OST File Viewer Software

Steps to Install the Software

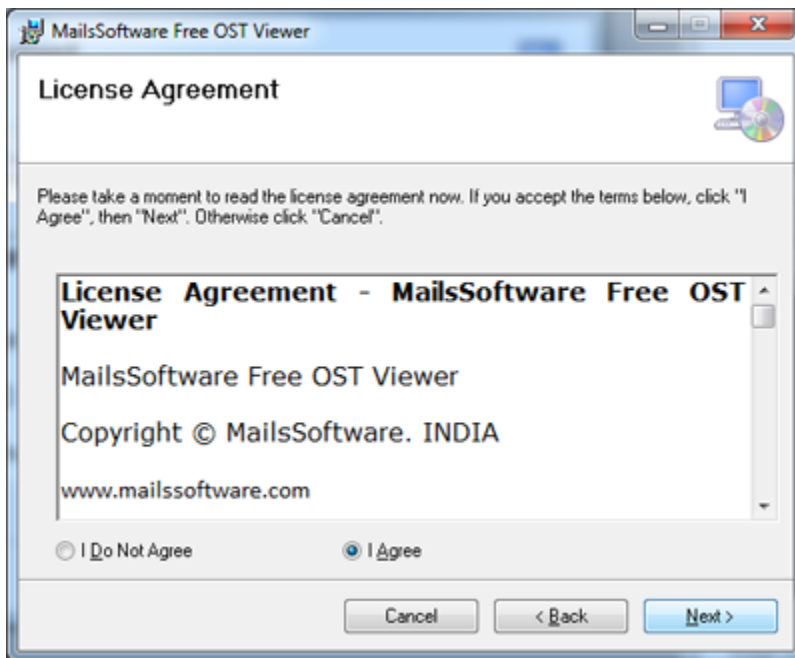

From here you will get the steps to follow for installing the MailsSoftware Free OST Viewer tool. But before moving on, you must have the installer file (.exe) in your local machine where you want to use this software. Get the .EXE from here <http://www.mailssoftware.com/dl/free-ost-viewer.zip>.

After downloading the .exe file, follow these given steps.

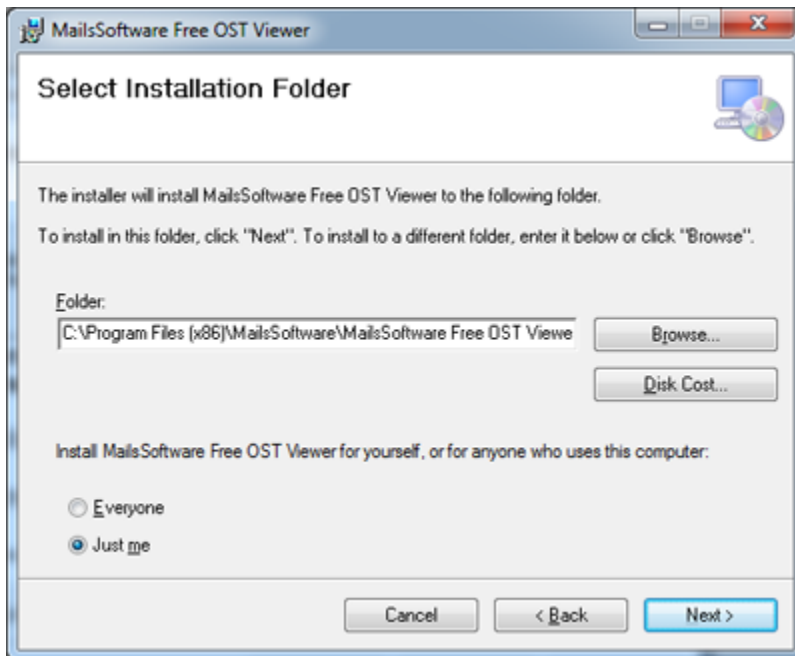

- 1- Double click on MailsSoftware Free OST Viewer installer file, and then you will get a Welcome window on your screen. Click on **Next**

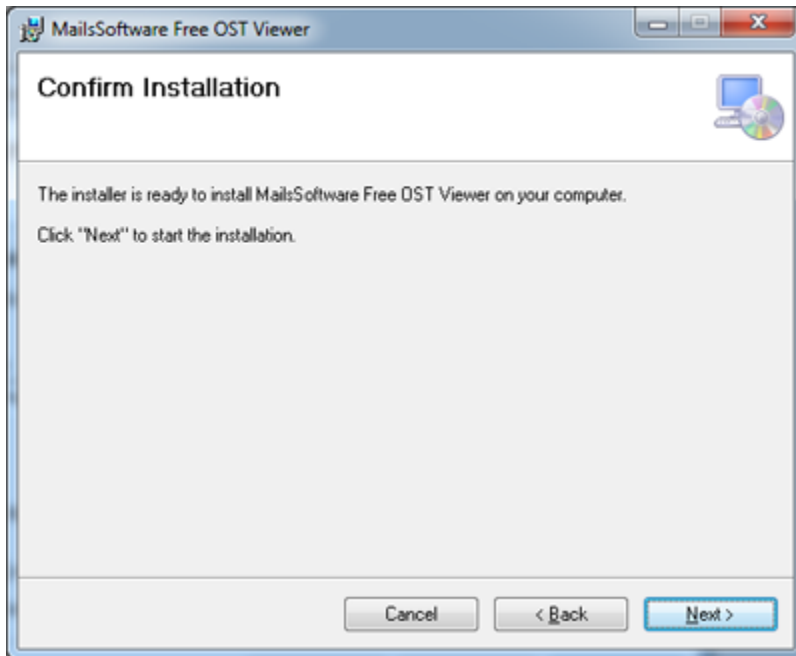

- 2- Now you will get License Agreement window. If you are agree with our T&C then select "I Agree" option otherwise go with "I Do Not Agree". Click on **Next**.

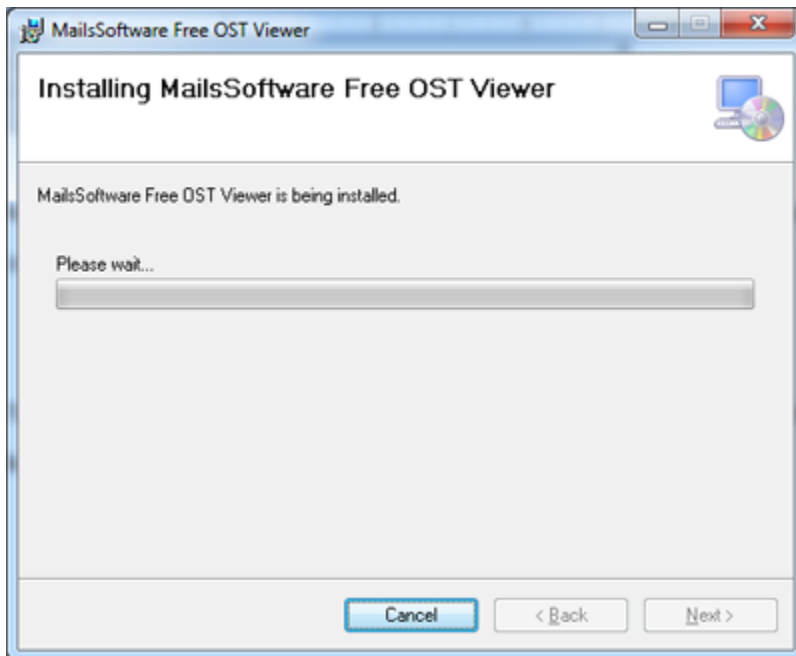

- 3- Provide the location to install the software if you want desired location otherwise the software will install by default in :/C drive of your machine. Then click on **Next**

4- Now the installer is ready to install, please click on **Next** button to install the software

5- Now you will get a processing window and it will automatically disappear after completing the software

6- The software is now successfully installed your machine. Click on **Next** button to finish the setup.
